Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 28 June 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 8, 10, 12-13, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5309228 to Nakamura.

As to claim 1, Nakamura discloses an image processor, wherein characteristics of plurality of skin colors are classified beforehand, comprising:

an area extractor which extracts skin areas from input image data according to the classification of the characteristics of a plurality of skin colors (Figs. 2 and 7, col. 2 line 14-col. 5 line 39, col. 14 lines 40-54); and

an image corrector which corrects image data of each of the skin area extracted by said area extractor according to the characteristics of the skin color of the each of the skin areas (Fig. 2, 8-11, col. 4 line 3-col. 8, col. 14 line 56-col. 20, col. 23 line 14-col. 26).

Claims 2, Nakamura further discloses the area extractor determines the characteristic of the skin areas according to average, dispersion (distribution), and center of gravity from a histogram of image data of each of the skin area (col. 15 line 56-col. 16 line 17, col. 28 lines 19-68).

Art Unit: 2623

As to claims 8 and 19, Nakamura further discloses the area extractor extracts the candidates areas from image data, converts the color specification system of the image data for each of the skin candidate area based on the image data in the color specification system (col. 20-col. 22).

Claims 10, 12, and 13 are the corresponding method and computer readable medium claims to claims 1 and 4 respectively. The discussion are addressed with regard to claims 1 and 2.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura.

As to claim 9, Nakamura discloses all limitations (Fig. 4a-c, and Fig. 22, col. 13-14, col. 27-28) except rectangle area and threshold of hue for the pixels.

Examiner takes Official Notice that those features are notoriously well known in the art, e.g. dividing the image into blocks and thresholding a color pixel.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the features in the system of Nakamura in order to accurately extract the colored skin area from the image.

5. Claims 7 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura in view of US 5075788 to Funda.

Art Unit: 2623

As to claims 7 and 18, Nakamura discloses all limitations (Fig. 4a-c, and 15 , col. 13-14, col. 15 line 56-col. 18, col. 23-25) except generating a correction curve.

Funda, in an analogous environment, discloses the step of generating a correction curve by modifying the color histogram (col. 10 lines 48-59 and col. 11 lines 41-col. 12).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the curve of Funda in the system of Nakamura in order to accurately correct the colored skin area from the image (Funda, col. 1 lines 11-48).

### ***Allowable Subject Matter***

**6.** Claims 3, 11, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4-6 and 15-17 depend from claims 3 and 14 are, therefore, objected.

### ***Conclusion***

**7.** The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6549644 to Yamamoto, US 5497431 to Nakamura, US 6332041 to Yoshida, US 6088137 to Tomizawa, and US 6034759 to Enomoto disclose methods for extracting and correcting skin areas from an image.
